Erode, Tamil Nadu, India | +91 94896 96215 | boopesh215@gmail.com | [linkedin](#)

PROFESSIONAL SUMMARY

Mechanical Engineer with hands-on experience in design engineering, currently working in a design-focused capacity at Tata Consultancy Services (TCS), engaged with an OEM mechanical and power equipment manufacturing client. Skilled in CAD/CAE tools including SolidWorks, CATIA, AutoCAD, Fusion 360, and ANSYS, with additional exposure to MATLAB, DFMA principles, and programming (SQL, Java, HTML). Winner of the Dassault Systemes Bracket Design-a-thon. Proven manufacturing exposure through internships in HPDC, GDC, and precision machining. Actively seeking to grow further as a Product Design / CAD Engineer.

TECHNICAL SKILLS

CAD / CAE Software: AutoCAD, Fusion 360, CATIA, SolidWorks, ANSYS, MATLAB

Design Methodology: DFMA (Design for Manufacturing & Assembly)

Programming & Data: SQL

Manufacturing Processes: HPDC (High Pressure Die Casting), GDC (Gravity Die Casting), CNC / Precision Machining

Domain Exposure: Power and energy infrastructure equipment (OEM mechanical), critical path and schedule analysis, cross-functional design coordination

PROFESSIONAL EXPERIENCE

Engineer – Design & Engineering Coordination

Aug 2025 – Present

Tata Consultancy Services (TCS) | Client: OEM Mechanical / Power Equipment Manufacturer

- Work within a design-adjacent engineering capacity supporting a large OEM mechanical/power equipment client, coordinating between design, engineering, and manufacturing teams on large-scale power and energy infrastructure projects.
- Support technical planning and critical path analysis for equipment design and build schedules, ensuring alignment between engineering design intent and manufacturing timelines.
- Collaborate cross-functionally with design and product engineering stakeholders, translating design changes into schedule and delivery impact.
- Prepare technical status reports and dashboards for engineering and management stakeholders.

Design & Manufacturing Intern

Oct 2023 – Nov 2023

Caparo Engineering

- Gained hands-on exposure to High Pressure Die Casting (HPDC) and Gravity Die Casting (GDC) processes for mechanical component manufacturing.
- Worked with precision machining operations, supporting quality checks and process documentation.
- Applied basic DFMA principles while reviewing component designs for manufacturability.

Engineering Intern

Aug 2023 – Sept 2023

Nidec Precision Tools

- Assisted with precision tooling and component design/production support in a high-precision manufacturing environment.
- Developed working familiarity with tolerance-critical design and tooling documentation.

KEY ACHIEVEMENT

- 1st Place – Dassault Systemes Bracket Design-a-thon: Won a University-level CAD design competition for optimized mechanical bracket design using SolidWorks.

EDUCATION

Bachelor of Engineering (B.E.), Mechanical Engineering

2019 – 2023

VIT Vellore | CGPA: 8.05 / 10

ADDITIONAL INFORMATION

- Languages: Tamil (native), English
- Interests: CAD design
